DUMPER JET L

Electric wheelbarrow designed to work with loads up to 500 kg / 1102 lbs.

The solid steel frame is powder coated with paint for exterior. The right balance between load and wheels, coming from a careful study, gives the user confidence, increasing the handiness in the manoeuvre operations.

The semi automatic tilting of the skip is helped by an electronic system, that controls the forward/backward speed guided by a knob accelerator. The discharge is therefore secure and practical even in closed environments, respecting the anti pollution normative for the noise and exhaust fumes emission.

The Dumper Jet is supplied with on/off keys and a red lever for extra safety, which allows to work only in the presence of assigned personnel. It is equipped with an emergency stop, led to verify the charging level, low level battery acoustic detector, and an external plug for a fast and easy connection to the charger.

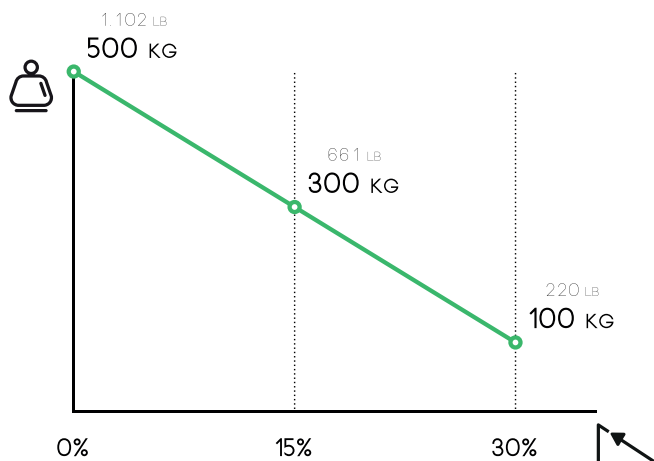

The 1000W motor has an electromagnetic brake that block off the Dumper Jet preventing accidental slippery while on ramps up to 30%. The gears in oil bath avoid any kind of maintenance and the machine can be cleaned easily without causing short circuits thanks to the controller and the well cabled wires kept in an hermetic ambient.

The tilting system of the Dumper gives the possibility to equip and change rapidly different types of accessories depending on the expected use.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
