FLYER is a 4-wheel electric vehicle, ideal for greenhouse cultures, increasing and aiding continuous movement in row cultivations.

It is equipped with a combined modular system of simple and easy transformation: from machine with seating for low cultures, to a high level platform for creeper harvesting such as tomatoes, peppers or simply for pruning while the operator remains on the vehicle.

The motor is equipped with an electromagnetic brake, that blocks off the vehicle preventing accidental slipping, coming in action automatically when the operator release the driving lever.

The gears in oil bath avoid any kind of maintenance.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
