A 3-wheel man on board electric powered propulsion vehicle. It is used for the transport of personnel, of merchandise, for the maintenance and inspection inside hospitals, industries, airports, warehouses, greenhouses, markets.

Jack Master has an incredible versatility of application in almost every field and on different types of ground. It is equipped as standard with two brake systems: electric lever on the handlebar and mechanical by a pedal for the total safety at full load.

The low footboard and the high seat make stepping on and off particularly comfortable and quick for the operator; besides, the multi-purpose platform in the back of the vehicle can be easily accessed from the driving seat.

Jack master can load up to 500 kg/ 1.102 lbs and can tow wheeled loads up to 2500 kg / 5.512 lbs.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
