M13 electric bed mover has been designed specifically for the transport of hospital beds in and around hospitals corridors.

The electric bed mover is easy to manoeuvre and requires the presence of just one operator and is compact enough to fit into a standard hospital lift when attached to a hospital bed.

Also as the electric bed mover comes with a remote control gives the member of staff the flexibility of being able to control the bed with ease.

The electric bed mover attached onto almost any hospital bed with specifically designed clamps that can be customized according to customer's need.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
