Professional 4-wheel pedestrian operated vehicles, specifically designed for cemeteries. Coffin handling and burial procedures made easy, without physical effort and totally safe. Move, lift and bury coffins with ease and in total safety, avoiding noise or emissions, indoor and outdoor.

Various configurations are available to perform multiple activities. With a coffin lifter, burials, especially in the higher crypts, can now be performed faster and more safely. Depending on the selected configuration, the coffin can be pushed manually with the help of rollers or moved electrically thanks to the motorized load platform.

CEMETERY LOGISTICS

Coffin Handling Made Safer and Less Strenuous

The **XT505** - is a 4-wheel pedestrian operated vehicle, silent, without emissions, no vibrations, no engine noise and minimal maintenance.

Model Highlights

- Appropriate for indoor and outdoor cemetery undertakings.
- Equipped platform rollers for effortless coffin alignment.
- A low-entry, electric-hydraulic lifting system with a 360° rotating turntable. Reaching heights of up to 6' 7".
- The motor is equipped with an electromagnetic brake that prevents accidental slippage while on ramps at full load.
 - Load capacity: 771 lbs., lift height: 79", Travel Speed: 3-mph, gradeability: 20%

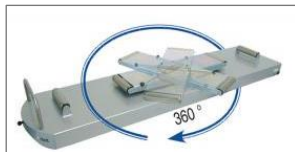

The **XT510 Full Optional**- is an electric hydraulic lifter, used to raise and delicately position coffins to heights of up to 13' 4".

Model Highlights:

- Quiet operation, compact and easy to maneuver, assuring total security during the operator's work.
- The swivel tiller head features a safety sensor, allowing to work to be performed by authorized personnel only.
- The levelling and stabilizing during the lifting phase is aided by 4 adjustable stabilizers.
- Popular options: Electric controlled sliding platform, rotating platform system and motorized rollers...
 - Load capacity: 771 lbs., lift height: 161", travel speed: 2-mph, gradeability: 20%
